Dear Mr. Smith:

This is to inform you that the New Jersey Department of Transportation's New Technologies and Products Section has completed its review of the SCI100GM re-directive, bi-directional and non-gating NCHRP Test Level III Impact Attenuator. Department policy requires that all safety related items used in NJDOT construction projects and safety zones meet current NCHRP 350 crash test criteria. The SCI100GM you submitted for evaluation meets NCHRP 350 criteria TL-3 testing, as supported and defined by the FHWA letter of September 12, 2003, signed by John R. Baxter, Director, Office of Safety Design (copy attached). The SCI100GM is therefore permitted for use on NJDOT construction projects in accordance with the definitions and configurations defined in the aforementioned FHWA letter.

Continued use of your product on NJDOT construction and maintenance projects is contingent upon its future performance. The New Jersey Department of Transportation reserves the right to discontinue its use in the event that it does not perform or function as intended.

Please be advised that this letter may not be used for advertising or promotional purposes without the written consent of the Commissioner of the New Jersey Department of Transportation.

If you have any questions please feel free to call me at (609) 530-2290 and please refer to the QMS number appearing in the top right corner of this letter and thank you for your interest in New Jersey's transportation system.

Sincerely,

A handwritten signature in black ink, appearing to read "Angelo A. Mendola".

Dear Mr. Smith:

The New Jersey Department of Transportation's New Technologies and Products Unit has completed its evaluation of SCI-70GM re-directive, bi-directional and non-gating, TL2 impact attenuator.

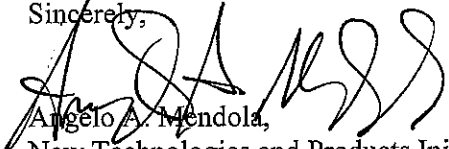

Based on verification of compliance with NCHRP 350 criteria for TL2 testing, NJDOT subject matter experts have determined that this product meets NJDOT's performance and design requirements, and is acceptable for use in permanent installations on NJDOT construction and maintenance projects.

Please note:

The NJDOT reserves the right to modify or revoke acceptance in the event of, but not limited to, in-service performance reveals unacceptable safety problems, excessive repair costs, or, if the product contains modifications that have not been approved by the NJDOT.

Please be advised that this letter may not be used for advertising or promotional purposes without the written consent of the Commissioner of the New Jersey Department of Transportation.

Sincerely,

Angelo A. Mendola,
New Technologies and Products Unit
